FOR IMMEDIATE RELEASE

PAETEC Offers Data Backup, Recovery, Dedicated Servers

FAIRPORT, N.Y. (July 24, 2007) – Hardware and software failures, human error, viruses and theft, environmental disasters. Business operations can be disrupted in numerous ways; having a continuity plan in place prior to when disaster strikes can save your business. In an effort to help businesses stay in business, PAETEC Holding Corp. (NASDAQ GS: PAET) today announced the availability of its Data Backup and Recovery, Dedicated Server, and Web Hosting solutions.

The PAETEC Data Backup and Recovery solution provides businesses with a secure, automated off-site server backup, copying critical data to two separate data centers over a customers' Internet connection as scheduled. Recovering data is as simple as "point & click" from the Web-based control console, allowing on-demand data restoration.

PAETEC Dedicated Servers are housed in a PAETEC owned and operated carrier-grade data center, complete with generator and battery-backed power, diverse network access and power grids, and 24x7x365 monitoring and staffing. This solution provides businesses the opportunity to place critical server applications within an environment offering the highest level of security and reliability, ensuring applications and business operations run at peak efficiency.

PAETEC Web Hosting provides a solution for businesses that desire a World Wide Web presence on the Internet, but prefer not to develop and support their own Web server, or don't have the IT resources required to host it themselves. All Web hosting packages include disk space, data transfer, an exclusive domain name and e-mail/Webmail capabilities.

The above solutions can also include PAETEC's MPLS VPN, SIP Trunk, and Network Firewall services to offer a comprehensive end-to-end solution for data, security, and disaster recovery.

"We understand the needs our customers have to access to and store data in a safe and secure environment," said Jack Baron, PAETEC's chief marketing officer. "Our solutions are housed in PAETEC facilities, not space leased from another provider, allowing for around the clock monitoring, technical support, security, network redundancy, and upgrades."

About PAETEC
