PAETEC Offers Free Webinar on Business Continuity Solutions
Enterprises Can Learn How to Manage and Recover from Disasters

FAIRPORT, N.Y. – (Oct. 14, 2008) – PAETEC Holding Corp. (NASDAQ GS: PAET), which provides data, voice and Internet solutions for business-class customers nationwide, will host free educational webinars later this month to help enterprises learn how to manage and recover from natural disasters and a catastrophic loss of vital business data.

Threats to business continuity extend far beyond natural events such as hurricanes, fires, or floods. Catastrophes more commonly result from e-mail viruses, hackers, equipment theft, human error, and faulty equipment. According to the research firm, Gartner, Inc., 52 million businesses suffered data compromises in 2006.

“Natural and man-made disasters are constant threats that can challenge an enterprises’ ability to fulfill its mission and even its survival,” said John Chapman, PAETEC Vice President for Strategy and Solutions. “This educational webinar will show how businesses can use data, voice and Internet services to maintain operations when a disaster occurs and to recover as quickly as possible in the aftermath.”

The live, one-hour webinar will be repeated over three days at the following times:

- Tuesday, Oct. 21, at noon ET.
- Wednesday, Oct. 22, at 3:00 p.m. ET.
- Thursday, Oct. 23, noon ET.

During the webinar, communications experts will discuss key business-continuity solutions that include:

- Data Backup and Recovery, which provides an alternate or redundant site to backup, store, and recover an individual file or an entire database.
- Dedicated Hosted Server, which ensures uninterrupted access to critical applications.

- Colocation Services, which provide alternate or redundant locations to house critical data and voice communications equipment.

Other significant services for business continuity include:

- Hosted Broadcast Notification, which can deliver mass notifications to employees and stakeholders.
- Direct Trunk Overflow and Advanced Toll-Free services, which can reroute inbound calls away from impaired sites to other working locations.
- Fixed Wireless options, which provide flexible alternatives to wireline facilities for network access.

To register, please visit PAETEC's online educational webinar page [here](#).
