**PAETEC Offers Free Webinar on Shared Web Hosting**

**Businesses Can Expand Outreach While Minimizing Demands on IT Resources**

FAIRPORT, N.Y. – (Nov. 7, 2008) – PAETEC Holding Corp. (NASDAQ GS: PAET), which provides data, voice and Internet solutions for business-class customers nationwide, will host free educational webinars this month to help enterprises learn how to create an effective online presence with minimal demands on internal resources.

The webinar is entitled “Shared Web Hosting: Driving Your Business’ Growth Through a Dynamic Web Presence.” The hosting service allows an enterprise to build informational, educational, and e-commerce Web sites without having to develop and support their own Web server. The service includes disk space, data transfer, an exclusive domain name, e-mail capabilities, and more, all for a low monthly rate. Users retain complete administrative and design control of their site.

The service is an excellent option for business-class customers that prefer not to develop and support their own Web server, or do not have the required internal information technology resources.

“Having your business on the Web can improve company communications, reduce operating costs, and enhance customer relations,” said Christopher Lodge, a PAETEC Division Vice President with responsibility for Web and data-colocation services. “The service also allows you to create an electronic ‘store-front’ that can expand your marketing and sales outreach locally and globally.

“Best of all, you can outsource the hassle of secure Web maintenance and gain the benefit of live support from a team of dedicated professionals,” Lodge said. “In addition, the service sets a strong business foundation to layer on additional network services as business needs evolve and expand.”

The live, one-hour webinar will be repeated over three days at the following times:

- Tuesday, Nov. 18, at noon ET
- Wednesday, Nov. 19, at 3:00 p.m. ET
- Thursday, Nov. 20, at noon ET

During the webinar, you will learn how:

- To customize a Shared Web Hosting solution to suit your unique requirements
- Easy it is to use a Website control panel
- Simple it is to expand your Website as your operations grow
- Easy tools can help you set up your own secured e-commerce site

To register, please visit PAETEC's online educational webinar page [here](#), or visit [www.paetec.com](http://www.paetec.com).
